To Help Prevent Dehydration, Heat Exhaustion & Heat Stroke

- Drink plenty of fluids
- DO NOT drink alcohol, beer and caffeine products like tea, coffee and soda
- Wear light loose fitting clothing with long pants and long sleeves, such as cotton
- Shorts and tank tops are not advised
- During outdoor activities, mist yourself with a spray bottle to avoid becoming overheated
- Have salty foods such as saltine crackers

Pre-Ride Maintenance Checklist

The quality of time we spend on the road often depends on what we do in the garage beforehand. Before riding your motorcycle at any time, make a general inspection to be sure it is in safe riding condition.

- Check oil tank oil level. See your Owner's Manual maintenance and lubrication section.
- Check tire condition and pressure. Incorrect pressure will result in poor riding characteristics and can affect handling and stability. See Owners Manual for correct tire inflation pressure to use. (After market tires may vary in pressure requirements...always check tire manufactures recommended tire pressures) P/N: 75110-98B or 75008-02A
- Check all electrical equipment and switches including the stop lamp, turn signals, and horn for proper operation.
- Check for any fuel, oil, or hydraulic fluid leaks.
- Check controls to be sure they are operating properly; operate the front and rear brakes, throttle, clutch, and shifter.
- Check rear belt adjustment. Service as necessary. P/N: 40006-85
- Check steering for smoothness by turning the handlebars through the full operating range.
- You can double the life of your battery by checking and correcting the water level regularly, especially if you live in a warmer climate. Everyone should check the battery at least every 2,500 miles. Never, however, attempt to add water to the permanently sealed, "maintenance free" batteries installed in newer models. On all models the use of a battery tender P/N: 94654-98 will prolong the life of all batteries if used properly.
- Call ahead to find road conditions and construction information on your route, if you know what it is.
- Make a list of the local Harley dealers along your route. This information can be found at harleydavidson.com

Be sure to check your Owner's Manual for proper maintenance instructions, or call Red Rock Harley-Davidson at 702-876-2884. Information was taken from Harley-Davidsons Hog Log.
