Dear Valued Customer,

We're hoping you've experienced a safe and enjoyable snowmobile riding season as once again we've received an abundant amount of snow making for superb trail conditions. As we all know ..... Spring is looming just around the corner thus bringing an end to our riding season once again.

We are **EXCITED** to inform you that **NEW** this year we will be offering **INSIDE STORAGE** for your snowmobile in a **CLEAN, SECURE** and **UNDISTURBED** facility. Storage prices start at **JUST \$25.00** per month for the 2009 season. Free up that space in your garage or that corner of the workshop you've reserved each year for your sled by storing your snowmobile with us, call today and reserve your spot as space is limited.

We would also like to take this time to remind you of the importance of proper summerization which will help prevent unnecessary down time and costly repairs next season such as battery failures, carburetor and fuel system contamination or engine damage. Let our Expert Factory Trained Technicians perform the steps necessary to prepare your snowmobile for the off-season taking the worry out of this important procedure.

Our summerization package includes oil & filter change on four stroke engines, draining fuel from carbs, treating the fuel system with fuel stabilizer, fogging the engine to protect internal components and applying anti-corrosion material to critical areas of the sled. In addition for those snowmobiles stored with us the battery will be charged and tested with periodic charging during the storage period. As an additional bonus to storing your sled with us it will be thoroughly **WASHED** to remove dirt and salt residue **PLUS** a coat of **WAX** will be applied to protect its finish prior to being placed in our storage facility.

Would you like to go into the next riding season confident your snowmobile is ready to ride when the snow arrives? As another benefit to storing your sled with us you will receive special summerization pricing **PLUS** a **15% DISCOUNT** on both **PARTS & LABOR** for pre-season repairs, such as tune ups, carbides, hyfax or any of those accessories you've been holding out for.

Thank you,

Kim, Paul, Jay & Rich
